CARTMAN / OPERATIONAL REPORT

2026-10-25T21:00:00+00:00 — 2026-10-31T23:04:00+00:00

Generated by benbenim

Report scope

Department: All departments

Support team: All support teams

All figures below are calculated from saved Cartman records in the selected period or are explicitly labeled as current snapshots.

Executive overview

Tickets created: 2

Tickets resolved: 1

Open work items: 0

Managed devices: 2

Open alerts: 0

Selected sections without available source data

Process telemetry records: No stored source data was available for this period.

Tickets and service desk

Created in period: 2

Resolved in period: 1

Backlog at period end: 1

Average first response (hours): 1.62

Average resolution (hours): 1.79

Tickets by support team

Tickets by status

Tickets by priority

Tickets by type

Tickets by escalation

SLA and response timing

24-hour requester-reply windows started: 1

Tickets auto-reopened after requester timeout: 0

Average first response (hours): 1.62

Average resolution (hours): 1.79

First-response samples: 1 · Resolution samples: 1

Cartman currently records a 24-hour requester-reply timeout. It is not a configured first-response or resolution SLA target.

Workload

Created in period: 13

CARTMAN / OPERATIONAL REPORT

2026-10-25T21:00:00+00:00 — 2026-10-31T23:04:00+00:00

Generated by benbenim

Completed in period: 13

Current open: 0

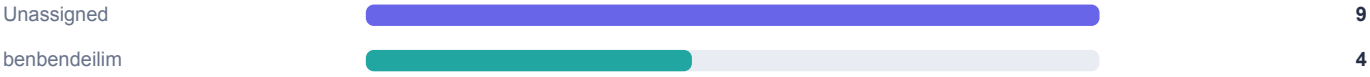

Current in progress: 0

Current in review: 0

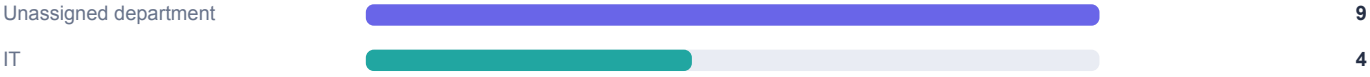

Work items by status

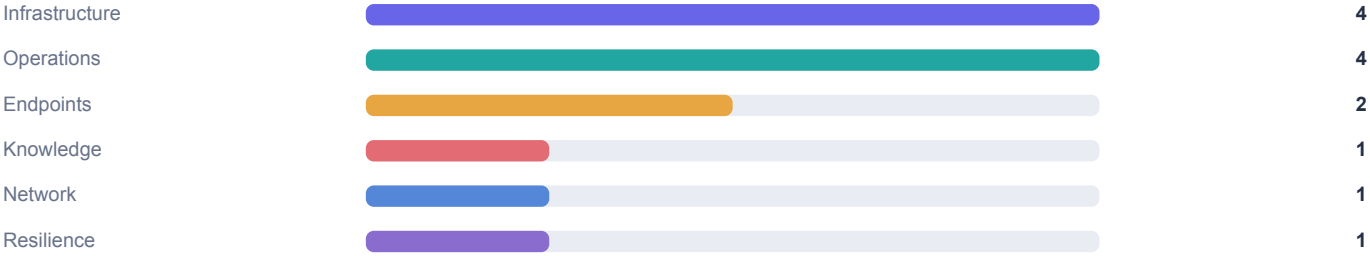

Current workload by owner

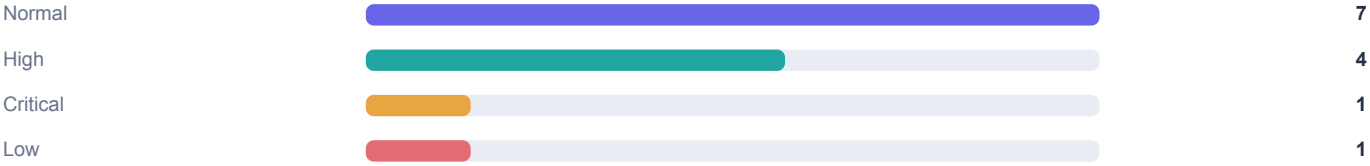

Current workload by department

Current workload by project

Current workload by priority

Work item due values are currently free-text labels, not normalized timestamps; overdue compliance is not calculated.

Endpoints and device inventory

Managed devices (current snapshot): 2

Newly registered in period: 0

Devices by status

Devices by operating system

Devices by type

Inventory assets (current snapshot): 5

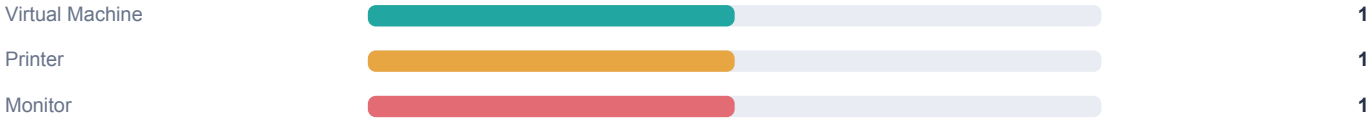

Inventory by type

CARTMAN / OPERATIONAL REPORT

Generated by benbenim

Device status and total are the current database snapshot; historical status reconstruction is not available unless event history

Monitoring and availability

Alerts created: 0

Alerts resolved: 0

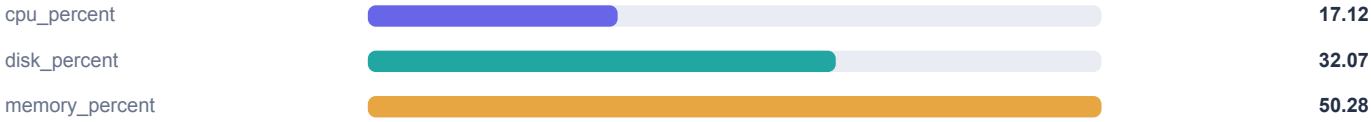

Open alerts now: 0

Events: 0

Metric samples: 4512

Average alert resolution (hours): Not measured

Metric averages

Availability success rate: Not measured% (0 checks)

Availability average response: Not measured ms

Service checks success rate: Not measured% (0 checks)

Service checks average response: Not measured ms

Network and VPN

Network Devices: 1

Network Subnets: 1

Network Ip Addresses: 2

Network Dns Records: 0

Network Dhcp Scopes: 0

Network Dhcp Leases: 0

Vpn Networks: 1

Vpn Gateways: 2

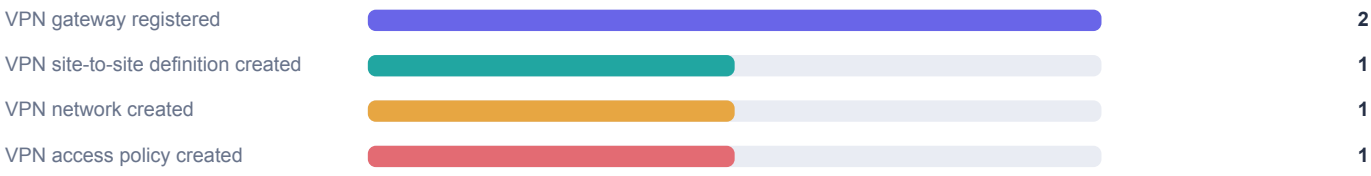

Vpn Peers: 0

Vpn Access Policies: 1

Vpn Site Links: 1

Events In Period: 5

VPN activity by event

Network and VPN records are shown as organization-wide configuration counts; only VPN audit events are period-based.

Endpoint tasks and deployment

Tasks created in period: 24

Endpoint tasks by action

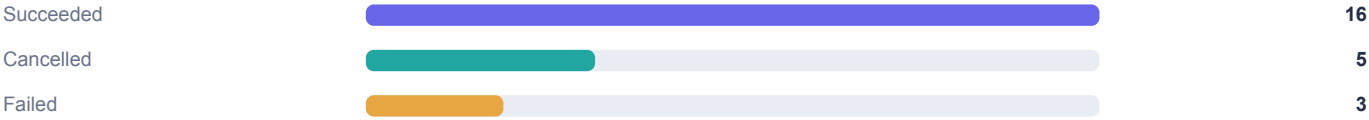

CARTMAN / OPERATIONAL REPORT
